WORK EXPERIENCE

Privately at home — Java, Unity Teacher

USA, California (Remote)   Sep 2021 - Sep 2022

- Taught Unity game platform and Java.
- Built relationships with students and ensured all students felt attended to with personalized feedback, class discussions, and encouragement.
- Designed and implemented performance improvement plans for underperforming students in consultation with parents.
- Methodically planned and executed on lesson plans, including collecting necessary resources to complete a given lessons.

Herat University — Assistant Teacher

Afghanistan, Herat   Jun 2020 - May 2021

- Assisted in Teaching HCI (Human Computer interaction) and Enterprise Softwires subject.
- Assisted in answering students' questions, enabling the teacher to complete 90% of lessons plans on time.
- Created individual homework assignments for students based on their progress in specific sections of the curriculum.
- Established healthy relationships with students by actively supporting students with academic and behavioral aid.
- Reinforced students learning skills and materials through daily and weekly check-ins, informal assessments, and observations.
- Partnered with teachers to implement developmentally suitable lessons tailored for students.
- Provided timely and frequent feedback to students, fostering an environment of open communication and interest in discovery.
- Collaborated with 2 teachers to prepare instructional materials and classroom displays for 2 classes.
- Maintained administrative records and prepared required reports for 2 classes and 120 students.

Digital To Future — Full Stack Engineer

USA, California (Remote)   Jan 2019 - Jul 2020

- Cooperate with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Develop project concepts and maintain optimal workflow.
- Complete detailed programming and development tasks for front end public and internal websites as well as challenging back-end server code.
- Identify and resolve web development issues reported by clients and completed different debugs.
- Design and implemented new product features.
- Identify opportunities to improve efficiency and functionality for servers, databases, and Application Programming Interface (APIs).
- Collaborated with other developers and stakeholders to create and maintain unit tests for website codes, resulting in a 10% reduction in bug-related delays and an overall improvement in code quality.
